Our origin and our history

Creators of the original and exclusive Casmara Algae Peel-Off Mask, since 1979

In the 1970s, after attending one of the most influential industry conferences, the Casmara's Team recognized the need for an effective cosmetic treatment following surgical procedures like blepharoplasty.

In response, we created the 1st Generation of the Original Casmara Algae Peel-Off Mask: a blend of alginate powder and water, applied to the skin, covering the eye area, and once set, providing a pleasant cooling effect that helped **decongest, soothe, hydrate, and repair the delicate skin in the facial area**. Moreover, this innovative mask requires no friction or direct manipulation for an effortless removal.

Driven by the innovation that has always defined our laboratory,
years of research and development have brought about:

Four generations
of the iconic Algae Peel-Off Masks

• 1979

CREATION OF THE 1st GENERATION
Algae Peel-Off Mask POWDER + WATER

• 1994

CREATION OF THE 2nd GENERATION
Algae Peel-Off Mask POWDER + GEL

• 2003

CREATION OF THE 3rd GENERATION
**Body Temperature Regulating Algae Peel-Off
Masks POWDER + GEL**

• 2014

CREATION OF THE 4th GENERATION
Ionizable Masks GEL + GEL

Algae Peel-Off Mask

The most iconic product from Casmara Laboratory

High-tech cosmetics formulated with **marine algae extract, known for its powerful moisturizing properties**, along with various active ingredients tailored to each mask.

These masks set on the skin, **applying a gentle, pleasant pressure, helping to improve the absorption of both previously applied active ingredients** and those contained within the mask itself.

The Algae Peel-Off Mask collection offers a range of options to **meet the needs of every skin type**, providing an optimal finishing touch to today's most sought-after **aesthetic and/or medical procedures**.

The **original and exclusive Casmara Algae Peel-Off Facial Mask** covers the eyes and lips, working with total safety and effectiveness where others fall short, improving the appearance of the eye area and lip contour.

They help reduce the skin's temperature by up to 8°C, delivering all the cosmetic and aesthetic benefits of cold. The result: a noticeable improvement in overall skin condition.

Firm Hydrate Tone Soften

OUR ACTIVE INGREDIENTS

The Casmara Algae Peel-Off Masks feature a variety of active ingredients that, when combined with the expertly crafted algae-based formula—free of iodine—make them the ideal recommendation as the final step in various procedures, including those using electronic devices or aesthetic medical procedures.

Additionally, they serve as the iconic finishing touch in some of Casmara's single-dose treatments.

“THE SECRET BEHIND THE CASMARA ALGAE PEEL-OFF MASK Marine algae...”

The algae used in the **Original Casmara Algae Peel-Off Masks** grow and thrive in the marine environment.

They constitute a natural source of nutrients, salts, and minerals, bathed in light energy for most of the time.

Thanks to this combination, the algae used in these exclusive formulas store high amounts of energy and components that offer tremendous benefits for the skin.

These masks, made from these marine algae, not only provide hydration, firmness, softness, and vitality but also eliminate the need for water or other components in their preparation, which could otherwise affect the final result. This approach also enhances sustainability.

Nature, technology, and sensory experience come together in one of the most iconic formulas in professional cosmetics worldwide.

• WHO IS IT SUITABLE FOR?

Suitable for all skin types, including sensitive or reactive skin.

Recommended for delaying and preventing signs of aging, decongesting the eye contour area, blurring wrinkles, rehydrating the dermal tissue, and redefining the facial contour.

Especially recommended for skin that has undergone cosmetological techniques, treatments, aesthetic medical procedures, and/or electrostatic currents.

• ACTION AND RESULTS

Each of the **Original Algae Peel-Off Masks** provides specific results that vary slightly depending on the combination of active ingredients.

However, due to their gel-like phase, developed with marine algae as the common thread across all masks, **this collection delivers a series of immediate, noticeable, and guaranteed results from the very first application.**

ACTIONS

- Occlusive action that enhances the penetration and absorption of previously applied active ingredients.
- Lower the skin's surface temperature by up to 8°C compared to the initial temperature, functioning like cryotherapy.
- Soothe and repair skin that has been temporarily affected by invasive procedures.
- Vascular exercise results from the cold/hot effect.
- Pores appear visibly smaller.
- Rehydrate the skin.

RESULTS

- Skin is left toned, firmed, and deeply hydrated.
- Flash effect—puffiness and dark circles are instantly reduced.
- Visible marks from previous treatments are immediately minimized.
- The skin surface is left smooth and even.
- Provide a natural plumping effect on dehydrated areas lacking volume.
- Leave the skin feeling clean, purified, and radiant.
- Immediate comforting effect.

The original Algae Peel-Off Masks Benefits

1

Molds perfectly to the skin

The Algae Peel-Off Masks are designed to **mold perfectly to the skin**, ensuring no air gets between the mask and the skin, **covering all areas, including the lips and eyes**, for complete care.

2

Hygiene and precision

Pioneers in single-dose formats for both treatments and Algae Peel-Off Mask, **delivering the precise amount of active ingredients at the appropriate concentration** for optimal results on the skin. This format also ensures **complete hygiene by minimizing product handling**.

3

Intensive action on specific areas

Our masks have an **ultra-targeted action on puffiness and the eyelids**, providing radiant and revitalized eyes. Their cooling action and the weight of the masks promote fluid drainage, reducing volume for a **more defined and sculpted face**.

4

Neck care and deep firming

Because we know the face doesn't end at the chin, Casmara Algae Peel-Off Masks also offer **exceptional care for the neck, firming and blurring signs of aging** in this delicate area.

5

Cooling and toning effect

Casmara's Algae Peel-Off Masks lower skin temperature by up to 8°C, providing a **cooling effect that decongests, restores, and offers an unique sensation of freshness** to the skin.

6

100% unisex

Everyone can enjoy a premium treatment, even those with beards. The density and elasticity of our masks means they can be **removed in one piece, without leaving any residue or staining the beard.**

7

Suitable for all skin types

As pioneers with half a century of experience in applying these revolutionary masks to different people all over the world, we can **recommend the Algae Peel-Off Masks for use on all skin types with extraordinary results.**

8

Perfect peel-off removal

The marine algae-based formula **allows the mask to be removed in one piece,** without residue or the need for water, making them more convenient and **eco-friendly.**

The original Algae Peel-Off Mask

The perfect complement to any facial or body aesthetic procedure.
A comprehensive collection of masks featuring the most effective active ingredients for every skin need.

PEEL-OFF MASK	ACTIONS	RECOMMENDED USE	MAIN ACTIVE INGREDIENTS Marine algae + ...
ROSE GOLD Mask NEW!	ANTI-AGING REJUVENATING	AESTHETIC DEVICES PROCEDURES	COLLAGEN: Combats sagging and improves the skin's overall appearance by boosting hydration and density. ELASTIN: Supports collagen fibers to provide firmness, tone, suppleness, and flexibility to the skin.
WHITE GOLD Mask NEW!	RECOVERING	AESTHETIC MEDICINE PROCEDURES	ARNICA: Recovering and soothing action. Restores the skin's sense of wellbeing. BISABOLOL: A natural reconstituting agent that protects and softens the skin.

- COMBINATION AND RECOMMENDED USE

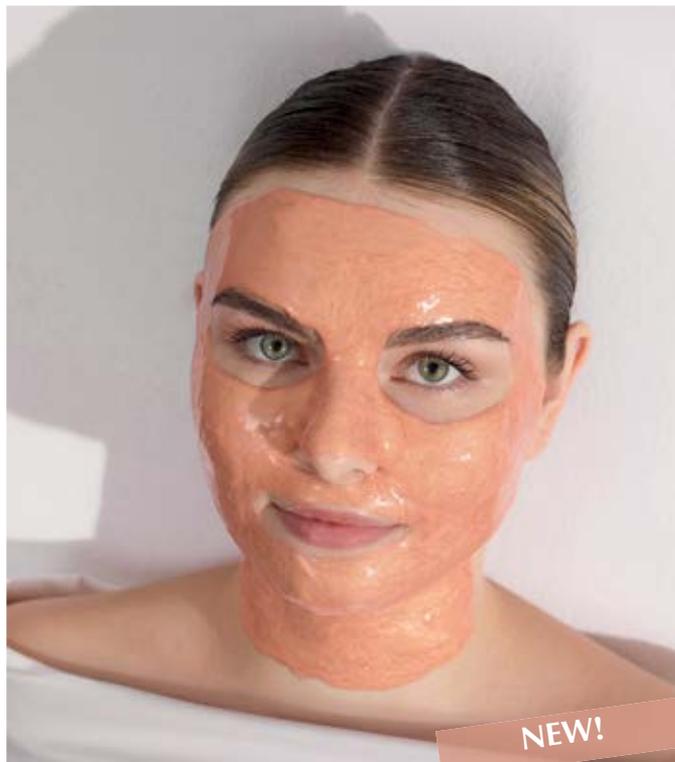

PEEL-OFF MASK	ACTIONS	RECOMMENDED USE	MAIN ACTIVE INGREDIENTS Marine algae + ...
GOLD Mask	REVITALIZING	OTHER PROCEDURES	GOLD: Revitalizes the skin by promoting mineral nutrient absorption while preventing skin sagging.
GREEN Mask	OXYGENATING	OTHER PROCEDURES	MINT: Its refreshing properties enhance oxygen absorption in the skin tissue.
GOJI Mask	ANTIOXIDANT	OTHER PROCEDURES	GOJI BERRIES + QUINOA SEEDS: Antioxidant action providing high protection against free radicals.
REAFFIRMING Mask	FIRMING DETOXIFYING	OTHER PROCEDURES	DIATOMS, AMINO ACIDS, AND TRACE ELEMENTS: Due to their high porosity, diatoms absorb excess sebum, making them ideal for oily or acne-prone skin.
SENSITIVE Mask	SOOTHING	SENSITIVE SKIN	OAT AND MALLOW ESSENCE: Ideal for sensitive skin, with softening and soothing properties.
VITAMIN VEGETABLE Mask	ANTI-WRINKLE	OTHER PROCEDURES	VITAMIN C AND DILL: Proven to reduce wrinkles and other signs of skin aging.
NOVANEW Mask	REHYDRATING	OTHER PROCEDURES	GLUCOSE: Helps retain moisture, especially after treatments that dehydrate the skin.
RGNERIN Mask	RETEXTURIZING	OTHER PROCEDURES	ALOE VERA + FLAX SEEDS: Boosts the skin's natural hydration levels.
R6TENSE Mask	STIMULATING	OTHER PROCEDURES	KIWI EXTRACT + POPPY SEEDS: The antioxidant properties of kiwi and the cell renewal stimulation from poppy seeds contribute to younger, more radiant skin.
THERMOACTIVE BODY Mask	VASODILATOR	OTHER PROCEDURES	CAPSICUM RESIN: Raises the skin's temperature, dilating blood vessels and improving circulation.
CRYOGENIC BODY Mask	VASOCONSTRICTOR	OTHER PROCEDURES	MICROALGAE: Provides a cooling sensation and tightening effect due to its vasoconstrictor properties.

ROSE GOLD Mask

A rejuvenating anti-aging mask enriched with **GOLD**, **COLLAGEN**, and **ELASTIN**, especially recommended to enhance the effects of aesthetic procedures that stimulate the skin's natural proteins, particularly radiofrequency treatments.

High-frequency procedures cause the skin's water molecules to vibrate, raising tissue temperature, which is felt as a gentle, pleasant warmth. Collagen is restructured, new fibers are formed, and elastin production is stimulated, improving skin firmness and suppleness.

Rose Gold Mask features **GOLD**, one of our most iconic and historically renowned cosmetic ingredients. Alongside gold, it contains active ingredients like **COLLAGEN** and **ELASTIN**, which amplify the effects of the device treatment. It also has a "**HEAT RETENTION EFFECT**" that helps to maintain the internal heat in the tissue, thus helping to prolong the results of the procedure performed beforehand.

NEW!

• ACTIONS

Anti-aging, rejuvenating, revitalizing, firming, and highly hydrating.

• ACTIVE INGREDIENTS

GOLD

A true treasure for the skin, revitalizing it with nutrients and minerals while reinforcing the protective barrier and enhancing radiance.

COLLAGEN

Combats flaccidity. Improves the skin's overall appearance by boosting hydration and density.

ELASTIN

Strengthens the skin's structure, providing firmness, tone, suppleness, and flexibility.

MARINE ALGAE

Deeply moisturizing. Thanks to the carbohydrates in the algae and their ability to set, a refreshing film is formed that gently presses against the skin, boosting the absorption of previously applied active ingredients and those in the mask itself, leaving the skin refreshed and dewy, looking youthful and healthy.

• WHO IS IT SUITABLE FOR?

Suitable for all skin types. The formula is unisex, ideal for any age and season.

• RESULTS

Skin looks more youthful, firmer, suppler, and more hydrated.

IMPORTANT: ROSE GOLD Mask can be applied around the eye area but is not recommended for covering the eyes or lips. It may generate a mild warming sensation, which can vary based on individual sensitivity and the procedure performed beforehand.

WHITE GOLD Mask

A recovering mask formulated with **GOLD, ARNICA, and BISABOLOL**, specifically recommended for post-aesthetic medical procedures.

As trends evolve, so does the aesthetic medicine industry, providing more options for those seeking to enhance their natural beauty through “non-surgical” procedures like injections, needling, or microneedling, such as Botox, hyaluronic acid, thread lifts, and peels.

White Gold Mask features **GOLD**, one of our most iconic and historically renowned cosmetic ingredients. It also contains active ingredients such as **ARNICA** and **BISABOLOL**, as well as an “**ICE EFFECT**,” cooling the skin’s temperature by up to 8°C for immediate recovery. These innovative ingredients, combined with marine algae, help restore the skin’s sense of wellbeing, contribute to skin barrier protection, and improve overall appearance.

• ACTIONS

Intense recovery, firming, and highly hydrating.

• RESULTS

Skin is soothed and restored.

• ACTIVE INGREDIENTS

GOLD

Nourishes and revitalizes the skin by promoting mineral nutrient absorption while preventing skin sagging.

ARNICA

Recovering, soothing. Restores the skin’s sense of wellbeing.

BISABOLOL

A natural reconstituting agent that protects and softens the skin.

MARINE ALGAE

Thanks to the carbohydrates in the algae and their ability to set, a refreshing film is formed that gently presses against the skin, boosting the absorption of previously applied active ingredients and those in the mask itself, leaving the skin refreshed and dewy, looking youthful and healthy.

• WHO IS IT SUITABLE FOR?

Suitable for all skin types. The formula is unisex, ideal for any age and season.

GOLD MASK Mask

REVITALIZING

A peel-off technology mask formulated with GOLD, combined with MINERALS such as calcium and sodium, fused with the marine algae base that defines the Casmara Algae Peel-Off Mask collection.

The most widely used peel-off mask in the world. This iconic cosmetic, which has transcended borders for decades, owes its effectiveness to **GOLD**, the most researched and utilized precious metal in cosmetics. Rich in highly biocompatible nanoparticles, gold salts possess potent revitalizing properties.

Working in synergy, calcium promotes keratinocyte differentiation, while sodium and potassium help balance hydration, delivering a powerful revitalizing effect that leaves the complexion luminous, revitalized, and deeply hydrated.

It is the recommended mask for finishing advanced treatments such as electroporation or virtual mesotherapy.

Available as part of the **Skin Sensations** treatment and in boxes of 10 sessions.

GREEN MASK Mask

OXYGENATING

A peel-off technology mask formulated with mint, fused with marine algae extract.

MINT, known for its oxygenating properties, is rich in vitamins A, C, and omega-3, as well as fiber, potassium, magnesium, calcium, and phosphorus.

This highly refreshing mask helps visibly reduce the appearance of enlarged pores and enhances oxygen absorption in the skin, making it an ideal choice for completing treatments like oxygen therapy.

Available as part of the **Purifying** treatment and in boxes of 10 sessions.

GOJI Mask

ANTIOXIDANT

A peel-off technology mask formulated with GOJI berry extract and QUINOA SEEDS, fused with marine algae extract.

This antioxidant facial mask boosts the skin's natural nourishment and restores optimal hydration levels.

Due to its superior composition of amino acids like methionine, arginine, histidine, lysine, and threonine, along with unsaturated lipids and vitamins, **GOJI** is a super food that promotes skin balance and strengthens its natural defense against free radicals, which cause photoaging and early wrinkles.

This amino acid combination ensures skin balance after the use of an ultrasonic spatula.

Available as part of the **GOJI** treatment and in boxes of 10 sessions.

REAFFIRMING Mask

FIRMING DETOXIFYING

A peel-off technology mask formulated with amino acids, trace elements, and aloin, combined with diatomaceous earth, offering powerful detoxifying action.

This Casmara Algae Peel-Off Mask effectively traps impurities and catabolic substances.

The fusion of marine algae with **DIATOMACEOUS EARTH**, derived from fossilized algae, gives the mask the ability to absorb excess oil from the skin.

Its exceptional cooling effect also makes it the ideal choice for concluding procedures aimed at firming and lifting the skin.

Available as part of the **Shine Stop** treatment and in boxes of 10 sessions.

SENSITIVE Mask

SENSITIVE SKIN

A peel-off technology mask formulated with OAT and MALLOW ESSENCE, fused with marine algae extract.

Rich in vitamins B and E, amino acids, and minerals, this mask is an ideal option for sensitive skin.

It is recommended for use following any procedure where a predisposition to sensitization or a sensitive skin condition is diagnosed.

OATS offer emollient and softening properties, enhancing the skin's appearance while delivering natural antioxidants that help soothe irritated skin.

The mucilage in **MALLOW** forms a protective barrier, locking in moisture and preventing dehydration, making this mask perfect for dry and sensitive skin.

NOVANEW Mask

REHYDRATING

A peel-off technology mask formulated with **GLUCOSE**, fused with marine algae extract.

GLUCOSE is a highly effective moisturizing agent that restores the skin's natural hydration balance.

It helps retain moisture in the skin, making it particularly beneficial for dry or compromised skin, especially after mildly invasive treatments, leaving it soft and supple.

Moisture retention is particularly beneficial after peels that can dehydrate the skin.

This mask's composition helps to maintain the skin's protective barrier, keeping it balanced and protected from external factors.

VITAMIN VEGETABLE Mask

ANTI-WRINKLE

A peel-off technology mask formulated with **VITAMIN C** and **DILL**, fused with marine algae extract.

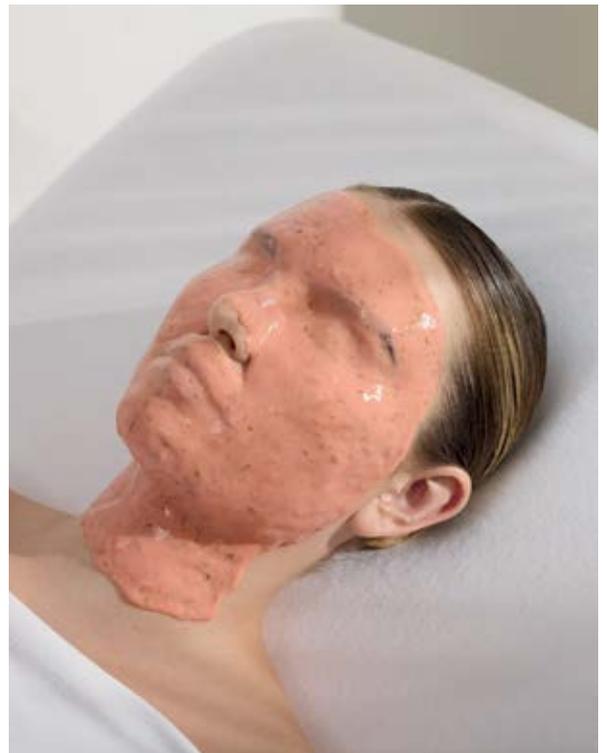

DILL extract, scientifically known as *Anethum graveolens*, is highly effective in reducing the appearance of wrinkles and other signs of aging.

Studies have shown that topical applications of cosmetic formulas containing dill can enhance skin suppleness and firmness, improving its overall appearance.

VITAMIN C deeply revitalizes the skin, imparting radiance, plumpness, and vitality, leaving it glowing and vibrant from the first application.

RGNERIN Mask

RETEXTURIZING

A peel-off technology mask formulated with **ALOE VERA** and **FLAX SEEDS**, fused with marine algae extract.

FLAX SEEDS offer a range of cosmetic benefits, particularly their ability to reduce wrinkles and improve uneven skin texture, thanks to their high levels of linoleic acid, alpha-lipoic acid, and omega chains.

ALOE VERA is ideal for renewing damaged tissue and is highly effective against visible signs of aging by strengthening cell membranes, resulting in renewed skin.

These active ingredients also boost the skin's natural hydration levels by enhancing the hydrolipidic barrier, working in harmony with facial hydrotherapy to achieve firmer, plumper skin.

RE6TENSE Mask

STIMULATING

A peel-off technology mask formulated with **KIWI EXTRACT** and **POPPY SEEDS**, fused with marine algae extract.

KIWI's cosmetic benefits come from its high content of vitamin C and antioxidants, which help soothe the skin.

POPPY SEEDS, rich in amino acids, antioxidants, and B vitamins, gently remove toxins from the skin, naturally promoting skin renewal.

This mask's ability to support skin renewal makes it the perfect complement after ultrasound treatments.

THERMOACTIVE BODY Mask

VASODILATOR

A body peel-off technology mask that activates internal heat, formulated with brown algae and capsicum resin (a botanical active ingredient).

It is recommended as the final step in body cosmetic and/or aesthetic medical procedures aimed at **reducing localized volume**.

Its effects include **anti-cellulite action, draining, and stimulation of basal metabolism** through hyperemic activity, combined with a **powerful rejuvenating effect** by delivering minerals, proteins, and vitamins.

The use of the **Thermoactive Mask** is not recommended on the face, chest, décolletage, or varicose areas. The hyperemia produced varies in intensity and duration depending on individual skin sensitivity but does not impact the product's safety or efficacy.

CRYOGENIC BODY Mask

VASOCONSTRICTOR

A body peel-off technology mask with a cooling effect, formulated with brown algae and microscopic unicellular algae.

It is recommended as the final step in body cosmetic and/or aesthetic medical procedures aimed at **firming the skin**.

Its active ingredients, rich in minerals and essential elements, offer **firming and hydrating benefits**, while its cryogenic effect creates immediate tension and vasoconstriction in superficial tissues, helping to improve blood circulation and nourish the skin.

It is also recommended for **tired legs, feelings of heaviness, and/or swollen areas**.

The result: **toned skin and complementary support for sagging treatments**.

• APPLICATION METHOD

Applying Casmara Algae Peel-Off facial mask is quick, easy, and hygienic, thanks to their design and composition.

Here's what you'll need: Sachet 1, Sachet 2, Bowl, and a Spatula.

First, empty the entire content of sachet 1 and 2 into a bowl.

Mix briskly with the spatula for around 30 seconds, until you achieve a uniform mixture.

Apply the mask quickly using the same spatula, spreading it evenly over the desired area. The mask begins to set after 3 minutes, so it's essential to work promptly.

The suggested **application order** is:

- 1.** From the center of the chin towards the temples.

- 2.** From the base of the nose towards the temples.

- 3.** From the center of the forehead towards the temples. (Repeat the same movements on the other half of the face).

- 4.** Inform the client that their eyes will be covered, and they should keep them closed. Apply a generous amount of product over the tear duct and slowly spread it towards the temple. (Repeat for the other eye).

- 5.** Cover the nose in a single movement, applying a small amount of the mask to one side and connecting both sides of the face that were previously covered from the base of the nose in step 2.

- 6.** Finally, cover the lips by applying a generous amount to one corner of the mouth and spreading it horizontally. If there is enough product left, extend it down to the chin and neck.

While Casmara Algae Peel-Off mask may appear to solidify on the surface a few minutes after application, the water content inside remains high, so it's essential to leave the mask on for at least 15 minutes. In certain external conditions, it's recommended to extend the time to 20 minutes to ensure the mask solidifies completely and can be removed cleanly, comfortably, and in one piece.

REMOVAL AND TIPS

- To remove the Casmara Algae Peel-Off mask, gently peel it off in a steady, downward motion after the recommended time.
- For easier removal, carefully loosen any edges that may have come into contact with the hairline or protective fabric, using the index fingers of both hands.

Tips for Removing Casmara Algae Peel-Off Facial Mask

- Experts often remove the mask with one hand while using the other hand to shield the client's eyes. This technique increases user comfort by preventing direct light from hitting the eyes after being covered for an extended period.
- Removing the mask in a downward motion helps keep the eyelids closed during removal. Peeling from bottom to top could encourage the eyes to open prematurely.
- If the user has difficulty breathing through their nose or prefers to talk during the process while still receiving the benefits of the mask on their lips, a small gap can be made between the lips using a wooden spatula once the area is covered and the product has begun to set. This adjustment doesn't affect the results or removal and can enhance comfort and safety in certain cases.
