The original Algae Peel-Off Mask, since 1979

ROSE GOLD Mask

ANTI-AGING

A rejuvenating anti-aging mask enriched with GOLD, COLLAGEN, and ELASTIN, especially recommended to enhance the effects of aesthetic procedures that stimulate the skin's natural proteins, such as radiofrequency treatments.

Suitable for all skin types, its unisex formula is ideal for any age and season. This high-tech peel-off mask is the perfect finishing touch for aesthetic procedures that use currents to subtly alter the skin's temperature.

It features a **“HEAT RETENTION EFFECT,”** helping to maintain the baseline temperature reached during the procedure, even though the skin's surface may feel slightly cool. This effect helps extend the benefits of the treatment.

The **ROSE GOLD Mask** combines gold, collagen, and elastin with seaweed to **enhance skin firmness, deeply nourish, revitalize, and improve overall appearance.** It maximizes hydration, suppleness, and flexibility, boosting the youthful qualities of the skin.

ACTION:

- ✔ Nourishes and revitalizes the skin by promoting the absorption of mineral nutrients.
- ✔ Fights and prevents sagging.
- ✔ Improves the skin's overall appearance by boosting hydration and density.
- ✔ Supports collagen fibers to provide firmness, tone, suppleness, and flexibility.

RESULTS:

- Cosmetology treatments that are fully sealed, amplified, and optimized.
- Skin with a visibly younger look.
- Skin that feels toned, firm, and deeply moisturized.

NOTE: *a slight tingling or warming sensation may occur on sensitive skin, which is entirely normal and a sign of the mask's activation.*

ROSE GOLD Mask

APPLICATION METHOD:

Empty the contents of sachet 1 into a bowl, then pour sachet 2 over it. Using a spatula, vigorously mix both components for around 30 seconds, until you achieve an even mixture.

Using the same spatula, apply and spread the mask over the desired area, working quickly, as the mask becomes harder to spread after 3 minutes and begins to set 4 minutes after mixing.

It is recommended **not to cover the eyes or lips** with the Rose Gold Mask.

From the center of the chin towards the temples.

From the base of the nose towards the temples.

From the center of the forehead towards the temples. Repeat the same movements on the other half of the face.

Cover the nose in a single movement, applying a small amount of the mask to one side and connecting both sides of the face that were previously covered from the base of the nose in step 2.

If there is enough product left, extend it down to the chin and neck.

After 15 to 20 minutes, remove the mask cleanly, comfortably, and in one compact piece, leaving no residue on the skin. Start peeling from the edges, pulling downwards with a gentle motion.
