SUITABLE FOR AESTHETIC MEDICINE PROCEDURES

FLASH RECOVERY ACTION

Luxury with extraordinary results

The original Algae Peel-Off Mask, since 1979

WHITE GOLD Mask

RESTORATIVE

A restorative mask formulated with GOLD, ARNICA, and BISABOLOL, especially recommended for post-procedure cosmetic care following medical-aesthetic treatments involving needling, micro-needling, or dermabrasion, such as Botox, hyaluronic acid fillers, or peels.

Suitable for all skin types, its unisex formula is ideal for any age and season. This high-tech peel-off mask is the perfect finishing touch for aesthetic procedures.

It combines restorative active ingredients with an “**ICE EFFECT**,” cooling the skin by up to 8 °C, providing immediate soothing and recovery effect.

WHITE GOLD Mask features active ingredients such as gold, arnica, and bisabolol, blended with seaweed to restore the skin’s sense of wellbeing, protect the skin barrier, and improve its appearance.

ACTION:

- ☑ Supports recovery from mildly invasive treatments.
- ☑ Comforting action.
- ☑ Helps to reduce and eliminate localized redness.

RESULTS:

- Restores the skin's sense of wellbeing.
- Skin feels comforted, recovered, and renewed.
- A refreshed face with a radiant and healthy appearance.

APPLICATION METHOD:

Empty the contents of sachet 1 into a bowl, then pour sachet 2 over it.

Using a spatula, vigorously mix both components for around 30 seconds, until you achieve an even mixture.

Using the same spatula, apply and spread the mask over the desired area, working quickly, as the mask becomes harder to spread after 3 minutes and begins to set 4 minutes after mixing.

WHITE GOLD Mask

From the center of the chin towards the temples.

From the base of the nose towards the temples.

From the center of the forehead towards the temples. Repeat the same movements on the other half of the face.

Inform the client that their eyes will be covered and should remain closed. Apply a generous amount of the mask over the tear duct, then slowly extend towards the temples. Repeat for the other eye.

Cover the nose in a single movement, applying a small amount of the mask to one side and connecting both sides of the face that were previously covered from the base of the nose in step 2.

Finally, cover the lips by applying a generous amount to one corner of the mouth and spreading it horizontally. If there is enough product left, extend it down to the chin and neck.

After 15 to 20 minutes, remove the mask cleanly, comfortably, and in one compact piece, leaving no residue on the skin. Start peeling from the edges, pulling downwards with a gentle motion.
