SELECTIVE DERMOPURIFYING TREATMENT

## *Understanding combination or oily skin to treat it properly*

Acne, blackheads, pimples, shine and/or enlarged pores are some of the main aesthetic problems that are associated with **combination, oily and/or acne-prone skin**. These are visible signs of discomfort that are sometimes aggravated by the use of inadequate cosmetics that are unable to treat the problem selectively and effectively, worsening its general condition.

These skin types have an imbalance due to *various factors*. The most common are *hormonal factors*, which mainly affect during adolescence. But there are also *endogenous factors*, such as genetic predisposition, or *exogenous factors*, such as stress, a diet high in sugars and carbohydrates, taking medications such as contraceptives or inadequate cleansing and skincare.

## What imbalances does combination or oily skin have?

Combination or oily skin is characterized by an imbalance of the epidermis at three levels:

- **Excess sebum secretion.** This excess causes sebum to build up on the skin causing the appearance of unsightly **shine** all over the face or localized in the “T zone”. It can also trigger other problems, such as **enlarged pores, pimples or comedones and acne, among others.**
- **Poor skin renewal (hyperkeratinization).** When this occurs, the dead cells on the outermost layer of the skin do not detach properly, which can lead to **pore clogging** and **skin thickening**. As a consequence, **the skin becomes rough**, with blackheads and an **irregular texture**, and **appears dirty and dull.**
- **Microbial proliferation.** Due to this excess sebum and hyperkeratinization, an anaerobic environment is created that promotes the bacterial proliferation of certain bacteria, such as *Corinebacterium acnes* and *Propionibacterium acnes*. These microorganisms are found in the skin flora, and when imbalanced, they release irritating and comedogenic substances, leading to the **appearance of inflammatory lesions.**

In addition, any of these conditions can be aggravated if not treated in time, which can result in skin with an uneven tone, with marks and lesions caused mechanically or by the inflammation of a blemish, irritation, sensitivity, etc. That said, it is vital to detect the needs of this skin type in time and treat them efficiently.

*Casmara is introducing **the ultimate professional treatment and complementary home care collection** for this skin type. An innovative combination of active ingredients with a **smart, selective action that works in depth** at different levels of the skin, rebalancing it and correcting and preventing the appearance of associated skin conditions. **A revolution in oily skin treatments.***

SELECTIVE DERMOPURIFYING TREATMENT

## Shine Stop TREATMENT

### • WHAT IS IT?

Shine Stop is an advanced professional treatment that selectively regulates oily areas of the skin while caring for, improving the appearance and enhancing the well-being of the face as a whole.

Its wide field of action ranges from normalizing slightly oily skin, through correcting more severe conditions such as hyperkeratinization or inflammation caused by oil build-up in the pilosebaceous follicles, in addition to fading blemishes.

The secret of its effectiveness lies mainly in the fusion of three technologies: **OZONE TECH based on ozone therapy**, which delivers a stream of active oxygen directly to the skin, **FDS TECH (Follicular Delivery System)** encapsulation in liposomes and **QUORA TECH**, which blocks bacterial communication signals to reduce bacterial proliferation and sebum production, paired with other innovative active ingredients that give this advanced treatment a powerful **rebalancing** action, helping to correct and prevent the appearance of blemishes associated with combination, oily and/or acne-prone skin.

# Shine Stop

SELECTIVE DERMOPURIFYING TREATMENT

## • WHO IS IT SUITABLE FOR?

The treatment is suitable for those with **combination, oily and/or acne-prone skin** and caring for skin conditions caused by excess sebum secretion: thickened skin, enlarged pores, irregular relief and tone, blackheads, pimples, shine, acne and comedones.

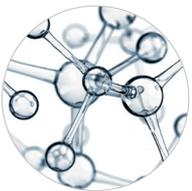

Unisex formula. It is recommended for all ages, both young and mature skin, due to its **powerful sebum-regulating action** as well as its **complementary preventive and anti-aging action**.

## • MAIN ACTIVE INGREDIENTS

### OZONE TECH

Innovative technology that delivers a supply of active oxygen directly on the skin, helping it to regain balance and correct and/or prevent the appearance of blemishes associated with oily skin. The ozone ( $O_3$ ) is stabilized in olive oil, and when applied to the skin it is released in the form of active oxygen ( $O_2$ ), delivering a powerful cell **oxygenating and purifying action** with **microbial and nourishing** rebalancing properties, providing comprehensive natural skin protection. In doing so, it **deeply cleanses and purifies at the cellular level, restoring the skin's balance** and correcting blemishes.

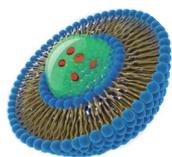

### MULTIACID COMPLEX

An advanced combination of highly **renewing acids**. This is an exfoliating complex featuring a blend of shikimic acid, biosuccinic acid and reinforced with polyhydroxyacids (lactobionic acid and gluconolactone). An exclusive synergy of acids with a **keratolytic and sebum-regulating action** similar to that of alpha-hydroxy acids but without the associated side effects like irritation, itching or peeling. It is the ideal peel for combination, oily and/or acne-prone skin that is sometimes vulnerable, with sensitivity and/or inflamed areas.

# Shine Stop

SELECTIVE DERMOPURIFYING TREATMENT

## FDS TECH (LIPOSOMAL ZINC)

A smart **and selective sebum-regulating active ingredient**. Its innovation lies in FDS technology (Follicular Delivery System, **encapsulation in liposomes**), which ensures the release of Zinc in the sebaceous gland to inhibit the 5- $\alpha$  reductase enzyme. It works selectively only in those areas where the skin needs it, reducing sebum secretion and delivering a **mattifying effect to the skin**.

## QUORA TECH

A natural active ingredient that **balances the skin's microbiome**. *Quora noni* concentrated extract that provides an innovative natural technology that blocks bacterial communication signals to prevent microbial formation and the development of its virulence. In doing so, it reduces the bacterial microbiota and sebum production. This results in visually smaller pores and a decrease in comedones and acne, thereby achieving an overall anti-blemish effect. What's more, its continued use prevents the appearance of future blemishes.

## • ACTIONS

- **REBALANCES THE ENTIRE COMPLEXION.**
- **TREATS, CORRECTS AND PREVENTS** blemishes in oily skin.
- **DERMOPURIFIES** intensively, balances the skin's microbiome and pH.
- **BALANCES SEBUM** smartly, and selectively regulates oil thanks to its liposomal active ingredients.
- **HYDRATES** deeply with a 24-hour action and soothing effect.
- **MATTIFIES.**
- **PREVENTS THE APPEARANCE OF ASSOCIATED PROBLEMS:** acne, marks, dark spots, dehydration and lack of nourishment.

# Shine Stop

SELECTIVE DERMOPURIFYING TREATMENT

## • RESULTS

- CLEAN AND BALANCED SKIN, **FREE FROM BLEMISHES.**
- MATTIFIED SKIN, **FREE FROM SHINE.**
- **REHYDRATED** SKIN.
- **RENEWED** SKIN WITH MORE EVEN TONE AND TEXTURE.
- SKIN IS **PROTECTED** AGAINST PROBLEMS ASSOCIATED WITH THIS SKIN TYPE.

SELECTIVE DERMOPURIFYING TREATMENT

## TREATMENT PHASES

### Shine Stop

PHASE\_1

#### TREATING CLEANSER

Sebum-regulating cleansing phase with a powerful antiseborrheic and comedolytic capacity. Multi-action phase: cleanses, purifies, hydrates and regulates sebum.

This cleansing gel contains natural surfactants composed of lipoamino acids derived from glutamic acid for gentle cleansing. It is also formulated with **niacinamide and azeloglycine**, providing the precise combination of active ingredients that work together to inhibit the reproduction of the bacterium that causes acne (*Propionibacterium acnes*), 5-alpha-reductase

(to prevent follicular obstruction), and tyrosinase (to reduce hyperpigmentation in acne lesions).

#### APPLICATION METHOD:

Apply to a previously cleansed face using a brush, making quick brushing movements to encourage the product to emulsify on the skin and drag out impurities. After achieving the characteristic foaminess of the phase, moisten with the fingertips wet with water and work with circular maneuvers to cleanse the skin. Finish by removing with Casmara cotton discs or compact towel.

PHASE\_2

#### PEEL MULTIACID COMPLEX

A powerful exfoliating phase combining different acids with a synergistic action and potent renewing and sebum-regulating properties. Formulated with **shikimic acid, biosuccinic acid**, and with the combined power of **lactobionic acid and gluconolactone** (polyhydroxy acids). Achieves a keratolytic exfoliating effect that removes impurities and dead skin cells without provoking an inflammatory response. Improves the skin texture and gets rid of blemishes.

#### APPLICATION METHOD:

Spread the product evenly over the face using your fingers and work into the skin using palmar pressure maneuvers until it completely evaporates for about 2-3 minutes. When the skin begins to look dry and feel sticky to the touch, rinse with plenty of water and dry with gentle pats.

## PHASE\_3

### OXYGENATING AND BALANCING OZONE TECH

**Oxygenating and balancing phase** that treats the skin in an innovative way thanks to its **Ozone Tech** technology based on ozone therapy. The addition of ozonated active ingredients delivers active oxygen directly to the skin, which with its oxygenating action and microbial rebalancing properties helps to restore balance in combination, oily and/or acne-prone skin. In addition, it enhances the regenerative action of the rest of the active ingredients, allowing it to correct common blemishes in this skin type.

#### APPLICATION METHOD:

Apply using an aesthetic massage to the face, neck, and décolletage until fully absorbed, performing maneuvers that promote blood microcirculation. For acne-prone or seborrheic skin, the recommendation is to massage using drainage techniques.

## PHASE\_4

### SMART SEBUM-REGULATING

Treatment phase combining the synergy of two innovative technologies: **QUORA TECH**, which balances the microbiome and **FDS TECH** (Follicular Delivery System), a powerful selective sebum-regulator composed of liposomal Zinc that acts on the sebaceous gland by inhibiting the 5- $\alpha$  reductase enzyme, which is responsible for sebum secretion, to achieve blemish-free skin. Along with the action of the **HYDRA+** active ingredients, which strengthen the skin's natural hydration, and **PORE MINIMIZER**, which minimizes the appearance of pores, achieving a smart sebum-regulating action.

#### APPLICATION METHOD:

Apply using an aesthetic massage to the face, neck, and décolletage until fully absorbed, performing maneuvers that promote blood microcirculation. For acne-prone or seborrheic skin, the recommendation is to massage using drainage techniques.

SELECTIVE DERMOPURIFYING TREATMENT

PHASE\_5

## DETOXIFYING HYDRATING REAFFIRMING MASK 2020

Peel-off mask with a balanced composition formulated with algae extracts, rich in **DIATOM EARTH, MARINE ALGAE, AMINO ACIDS, TRACE ELEMENTS** and **ALLOIN**.

Featuring a **detoxifying action**, this mask is capable of removing impurities and catabolic substances from cellular function. Provides optimal skin hydration, toning and muscle stimulation due to the spectacular release of cold.

**WARNING:** *Due to the product's natural origin, the color, density and/or perfume may vary slightly, without affecting its optimal quality.*

**APPLICATION METHOD:** 15-20 min. approx.

1. Empty the entire contents of the GEL (1) and POWDER (2) into a bowl.
2. With the help of a spatula (preferably plastic), vigorously mix both components for around 30 seconds, until you achieve an even mixture.
3. Using the same spatula, apply and spread the mask over the desired area, wasting no time, as the mask begins to set 4 minutes after starting the mixture. You may cover the eyes and lips.
4. Leave the mask to set for 15-20 minutes.
5. Remove the mask in one piece.

## PHASE\_6

## ANTI-AGING SEBUM-REGULATING

Treating phase with an anti-aging mattifying action. Made up of a unique combination with a powerful sebum-regulating action, featuring two technologies: **QUORA TECH** and **FDS TECH (liposomal zinc)**, combined with **Retinol-V, Pore Minimizer and Hyaluronic Acid**, with a powerful anti-aging action.

This phase leaves skin with a shine-free finish while treating and preventing signs of aging.

### APPLICATION METHOD:

Apply the appropriate amount after removing the mask, using an aesthetic massage to the face, neck, and décolletage until fully absorbed, performing maneuvers that promote blood microcirculation. If deemed appropriate based on the skin's needs, give the rest to the client to use at home.

## Shine Stop COLLECTION

### SMART TECHNOLOGY FOR BLEMISH-FREE SKIN

The SHINE STOP collection's formula includes two innovative technologies: **FDS TECH** (Follicular Delivery System) encapsulation in liposomes, **LIPOSOME SYSTEM** and **QUORA TECH**, which blocks bacterial communication signals to reduce bacterial proliferation and sebum production. The two technologies work in synergy, selectively and in depth to balance the skin while banishing and preventing blemishes in combination, oily and/or acne-prone skin.

## HYDRO

### *Sebo-regulating Gel-cream*

50ml 1.7 fl. oz.

**Sebum-regulating, hydrating** gel-cream that mattifies the skin for a shine-free finish.

This is the specific product for skin with signs of discomfort and to correct and prevent blemishes associated with oily skin.

Its exquisite **dry-feel texture** provides a comforting finish. The skin as a result is **hydrated, balanced and blemish-free**.

Thanks to its technologies, **FDS TECH** encapsulation in liposomes and **QUORA TECH**, it regulates excess sebum and shine on the skin while correcting and preventing blemishes in oily skin. Its formula is enriched with **HYDRA+**, a 24-hour hydrating active ingredient that deeply rehydrates and maintains hydration levels to relieve discomfort; as well as **Pore Minimizer**, which reduces the appearance of pores, achieving a smart and optimal sebum-regulating action.

It rebalances, hydrates, comforts and specifically helps combination, oily and/or acne-prone skin to regulate excess sebum and shine on the skin, keeping it healthy and beautiful.

### • MAIN ACTIVE INGREDIENTS

- **FDS TECH** encapsulation in liposomes, which releases Zinc directly into the sebaceous gland for a **smart sebum-regulating action** that **mattifies** the skin.
- **QUORA TECH**, a powerful **microbial balancer**, with an anti-blemish effect that reduces and prevents the appearance of pimples, acne, comedones, dirty and/or enlarged pores, achieving visually smaller pores.
- **PORE MINIMIZER**, featuring an astringent action, **which improves the visible appearance of oily skin by reducing the appearance of pores and improving skin texture**.
- **HYDRA+**, with a **24-hour hydrating action**, strengthens the skin barrier, helping the skin to maintain optimal hydration levels.

### • WHO IS IT SUITABLE FOR?

Specially recommended for combination, oily and/or acne-prone skin in need of a hydrating care that keeps skin matte and free from blemishes.

### • APPLICATION METHOD

Apply morning and night to your clean face and neck until fully absorbed.

# Shine Stop

COLLECTION

## ANTI-AGING *Sebo-regulating Cream* 50ml 1.7 fl. oz.

Sebum-regulating **anti-aging cream** that mattifies and rejuvenates the skin.

This is the definitive specific product for skin in need of anti-aging care while needing to get rid of blemishes associated with oily skin.

Its innovative **lightweight, fast-absorbing texture** provides an invisible and flawless finish.

Thanks to its technologies, **FDS TECH** encapsulation in liposomes and **QUORA TECH**, it regulates excess sebum and shine on the skin while correcting and preventing blemishes in oily skin. Its formula is enriched with **Retinol-V**, **Pore Minimizer** and **Hyaluronic Acid** with a powerful regenerative and anti-wrinkle action that treats and prevents signs of aging, delivering an overall improvement of the cutaneous microrelief.

It rebalances, hydrates, softens expression lines and specifically helps combination, oily and/or acne-prone skin to regulate excess sebum and shine on the skin, correcting and preventing the appearance of blemishes.

### • MAIN ACTIVE INGREDIENTS

- **FDS TECH** encapsulation in liposomes, which releases Zinc directly into the sebaceous gland for a **smart sebum-regulating action** that **mattifies** the skin.
- **QUORA TECH**, a powerful **microbial balancer**, with an anti-blemish effect that reduces and prevents the appearance of pimples, acne, comedones, dirty and/or enlarged pores, achieving visually smaller pores.
- **PORE MINIMIZER**, featuring an astringent action, **which improves the visible appearance of oily skin by reducing the appearance of pores and improving skin texture.**
- **RETINOL-V**, with a renewing and anti-aging action, **helps to reverse photoaging while improving skin elasticity and preventing signs of aging.** It also helps prevent and improve marks and dark spots on this skin type.
- **HYALURONIC ACID**, with a **moisturizing and wrinkle-filling action**, which softens expression lines. Helps keep skin smooth and well hydrated.

### • WHO IS IT SUITABLE FOR?

Specially recommended for combination, oily and/or acne-prone skin in need of an additional anti-aging care that keeps skin matte and free from blemishes.

### • APPLICATION METHOD

Apply morning and night to your clean face and neck until fully absorbed.

## SEBOCONTROL *Anti-Blemish Gel* 10ml 0.3 fl. oz.

Intensive care gel with **balancing and astringent** properties for all skin types with localized blemishes. Its innovative formula featuring Azelogyline and B-Peptide regulates sebum secretion and helps get rid of blemishes faster.

Its **fast-absorbing gel texture** provides an invisible finish.

This is an expert product to apply on localized blemishes to help them quickly disappear.

### • MAIN ACTIVE INGREDIENTS

- **AZELOGLYCINE:** an intense sebum-regulating active ingredient that reduces excess sebum and oil production on the skin. Its smart action means it only releases in areas with excess sebum secretion.
- **B-PEPTIDE:** a peptide with balancing properties that strengthens the skin's immediate defense mechanisms, thereby helping to erase blemishes.

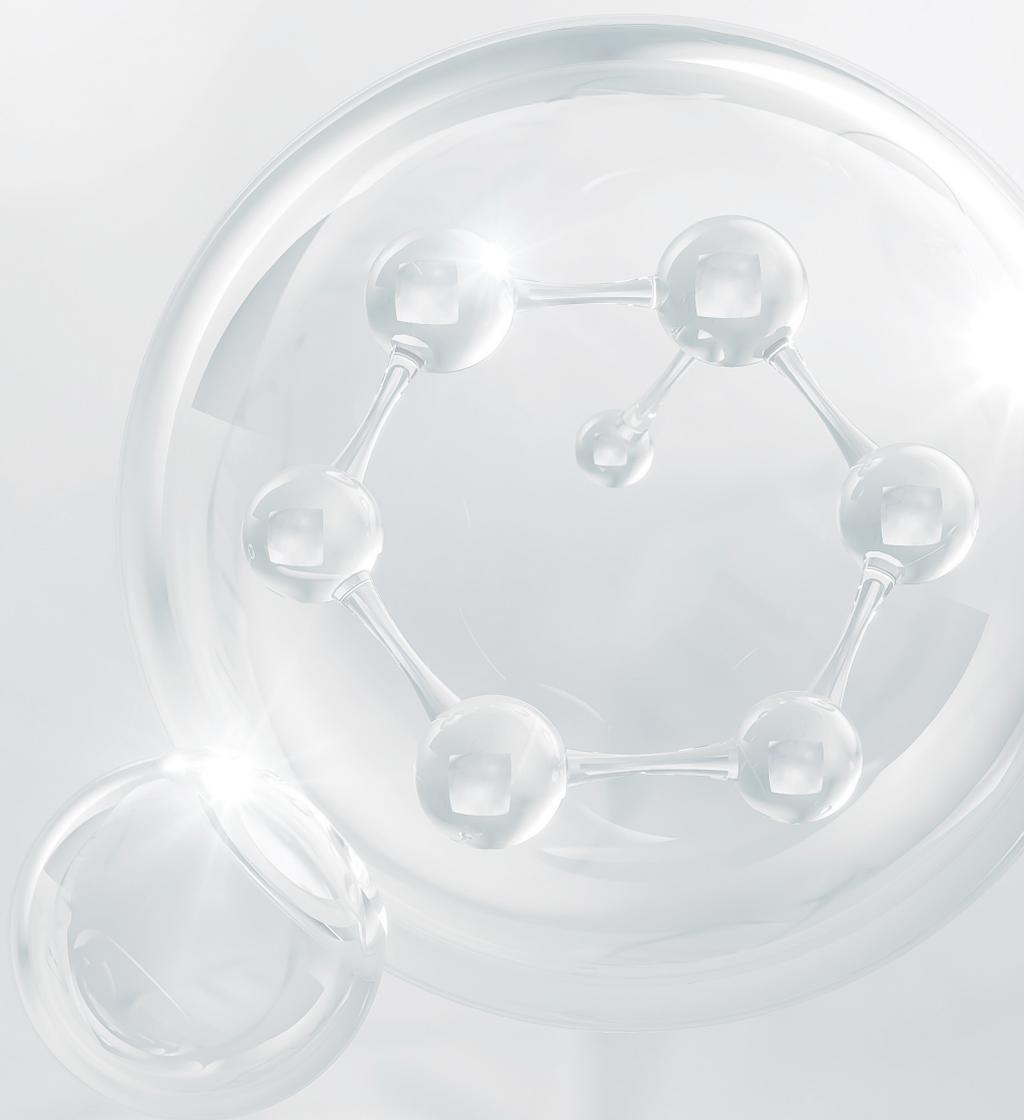

### • WHO IS IT SUITABLE FOR?

Recommended for all skin types, especially combination, oily and/or acne-prone skin with localized blemishes. Particularly useful for post-acne skin and men prone to folliculitis after shaving. Unisex formula.

### • APPLICATION METHOD

Apply to the blemish to be treated, massage in and leave to work. Apply as many times as necessary until the blemish disappears.
