RGnerin COLLECTION

Anti-wrinkle strategy x4

*Advanced daily cosmetics collection with a **quadruple ANTI-WRINKLE STRATEGY**. Thanks to its innovative **Botox effect and multifunctional active ingredients**, it acts on visible wrinkles and expression lines and the processes that cause them to appear.*

An iconic, innovative and pioneering anti-aging cosmetics line with a preventive and treatment action that works globally to help the skin look visibly younger.

How does the RGnerin cosmetics range work?

FROM THE OUTSIDE. Its highly renewing **regenerating action** removes the superficial layer of aging cells and promotes the creation of new ones. This results in a refined microrelief, which appears visibly smoother, while improving the overall condition of the skin by increasing its elasticity and firmness, and protecting it against the passage of time.

FROM THE INSIDE. Its double **plumping action** with a redensifying effect is the result of stimulating the synthesis of skin-enhancing substances such as hyaluronic acid, collagen and elastin while hydrating the skin, filling wrinkles from the inside to reduce their depth and length.

At the same time, its Botox effect **smooths** the skin and **inhibits** repetitive facial movements, which enhances this innovative formula, taking anti-wrinkle cosmetic care to another level for extraordinary results. Anti-wrinkle treatment and preventive action that helps to relax the facial muscles, reducing the appearance of wrinkles by softening repetitive facial movements, thus preventing existing wrinkles and expression lines from becoming more accentuated, as well as their future appearance.

RGnerin

*Wrinkle serum*_50 ml

Regenerating anti-wrinkle day/night serum

with a quadruple anti-wrinkle strategy: plumps, regenerates, smooths and inhibits thanks to the innovative blend of alpha-hydroxy acids and Botox-effect active ingredients. Exclusive, highly concentrated complementary product suitable for all ages and skin types.

Advanced **anti-aging formula with a fluid, oil-free texture**. Renews, smooths and redensifies while offering a powerful antioxidant action that protects the skin against aging, resulting in an intense overall improvement to the complexion day after day.

Revolutionary formula made with Botox-effect active ingredients, alpha-hydroxy acids and a vitamin concentrate.

Who is it for?

Ideal for all skin types, including combination skin. Especially formulated to treat wrinkles and signs of aging, while strengthening the skin to prevent their appearance.

RGnerin

HYDRO-NUTRI

Wrinkle cream_50 ml

Hydro-nourishing anti-wrinkle day/night cream with a quadruple anti-wrinkle action. Extraordinary **anti-aging formula** with a balanced combination of hydration and nourishment thanks to the blend of alpha-hydroxy acids, macadamia oil, hyaluronic acid, amino acids and innovative, highly perfecting Botox-effect active ingredients.

Who is it suitable for?

Rich-textured cream suitable for normal/dry skin. Especially formulated to treat wrinkles and signs of aging, while strengthening the skin to prevent their appearance.

RGnerin

NUTRI+ *Rich Wrinkle cream_50 ml*

Advanced **ultra-nourishing anti-wrinkle day/night cream** with an exclusive anti-aging action and intense nourishment. Its innovative revolutionary formula combines next-generation Botox-effect multifunctional technological active ingredients that act synergistically with highly renewing alpha-hydroxy acids and botanical oils. Together, these work at cell level to repair damage and protect the skin against the passage of time.

Who is it suitable for?

Rich-textured cream suitable for dry or extra-dry skin. Especially formulated to treat wrinkles and signs of aging, while strengthening the skin to prevent their appearance.
