Three Action Peel with $\alpha\beta$ -HA TECHNOLOGY

Intelligent exfoliation with high perfecting power

$\alpha\beta$ -HA

GLYCOLIC · LACTIC · SALICYLIC

PURIFIES. RENEWS. REHYDRATES

Three Action Peel $\alpha\beta$ -HA TECHNOLOGY

Exfoliating renewal serum that offers gentle exfoliation and cares for the skin. Based on alpha and beta hydroxy acids (AHAs + BHA) that act on the skin at three different levels to intensively perfect it.

Three Action Peel with $\alpha\beta$ -HA Technology is the perfect fusion of three acids that work together to eliminate imperfections, regenerate, purify, moisturize, cleanse and intensely smooth the skin. Its perfect, comfortable, state-of-the-art serum texture facilitates its application and helps the acids in its formula to act homogeneously on the skin, achieving an advanced, uniform result.

$\alpha\beta$ -HA TECHNOLOGY

[5.6% Glycolic Acid] + [1.8% Lactic Acid] + [0.5% Salicylic Acid]

- **GLYCOLIC ACID (AHA):** skin-renewing exfoliant that deeply penetrates the skin. Eliminates aged cells by stimulating skin renewal. Significantly reduces wrinkles and other signs of aging. Results are immediate and long-lasting.
- **LACTIC ACID (AHA):** rehydrating exfoliant that removes the layer of dead skin cells, improving the microrelief while penetrating the skin at a medium depth, fixing water molecules inside the skin and reinforcing its protective barrier to prevent dehydration.
- **SALICYLIC ACID (BHA):** purifying exfoliant that acts on the surface and inside the pore. Eliminates the accumulation of dead cells and sebum, intensely purifying the skin and refining the pores.

RESULTS

- Smooths the skin microrelief. Imperceptible pores.
- Faded age spots. Bright and unified tone.
- Intensely moisturized skin.
- Smooths wrinkles, fine lines and skin imperfections.
- Clean, extra-soft skin.
- Strengthens skin against signs of aging.

WHO IS IT SUITABLE FOR?

Ideal for all skin types, even sensitive skin. Recommended for any age, especially young and/or acne-prone skin, or as a preventive treatment to improve the signs of aging.

INSTRUCTIONS FOR USE

Apply to the face, avoiding the eye area, or to the area of the body to be treated (décolleté, arms, back, legs, etc.) and leave on for 15-20 minutes.

Then massage with the fingertips (sensitive skin) or with a gauze pad moistened with water and rub in circular motions for about 3 minutes to remove dead skin cells. Finally, remove with plenty of water.

15-DAY INTENSIVE PLAN

To obtain a more intense result in a short period of time, we recommend following the intensive plan. This advanced care consists of a 15-day beauty plan during which you should apply Three Action Peel daily after cleansing the face or body area to be treated as a step in your nightly beauty routine.

MAINTENANCE PLAN

After following the intensive plan, or the plan for sensitive skin, it is essential to follow the maintenance plan to avoid an excessive accumulation of dead cells, the appearance of imperfections, and dull skin tone, and to help smooth out all signs of aging.

The plan consists of applying Three Action Peel every three days, always at night, to previously cleansed skin as a regular step in your nightly beauty routine.
