# Oxygenating Mask

**Oxygenating mask** is an advanced oxygenating preparatory face mask that cleanses, purifies and energizes the skin.

Its exclusive advanced formula preps the skin for the daily beauty routine in the most innovative way.

## Actions

- 01 Purifying:** Eliminates 100% of impurities and polluting particles that accumulate on the skin, guaranteeing the maximum penetration of skin care products applied afterwards.
- 02 Oxygenating:** Increases oxygen levels in the cells, helping them to function perfectly. Thanks to this, the cells work at 100% of their capacity.
- 03 Energizing:** Increases the energy available to cells to perform their functions, which improves the natural processes carried out in the skin.
- 04 Stimulating:** The micro-massage action stimulates microcirculation, promoting the delivery of nutrients to the skin.

## Results

- Intensely purified, luminous and energized skin. Radiant.
- Perfectly prepared complexion to guarantee the maximum efficiency of serums and creams applied afterwards.

## Active ingredients

**Active oxygen:** Purifies and brightens the skin. Its action exponentially improves the cells by providing them with high levels of oxygen to guarantee they function optimally.

**Glucoclean:** Natural purifying cleanser. A sulfate-free active ingredient derived from glucose that deeply yet gently cleanses without irritating the skin.

**C-Energy:** Provides energy at a cellular level. This biotechnological active ingredient of botanical origin stimulates cellular respiration by increasing oxygen delivery to the cells.

**Avocado oil:** Nourishes and softens. Provides nutrients to keep the skin healthy and balanced with a silky, velvety feel.

## Who is it suitable for?

Suitable for all skin types, even the most sensitive skin. Especially suitable for fatigued or asphyxiated skin requiring deep cleansing and oxygenation.

## Application method

Apply in the morning or evening before your daily skin care routine. Wet your face and neck with water and spread the product over your skin (avoiding the eye contour). Massage with circular movements and leave on for a few minutes. Rinse thoroughly to remove.

For a double cleansing protocol, we recommend applying the multifunctional cleanser or Three Action Peel exfoliating gel, followed by the Oxygenating Mask.

With Oxygenating Mask, the skin is perfectly prepared for the application of your usual serum and/or cream.
